Please cancel Claims 1-10 and 16.

Please amend the daims as follows:

- 1. (Canceled)
- 2. (Canceled)
- 3. (Canceled)
- 4. (Canceled)
- (Canceled)
- 6. (Canceled)
- 7. (Canceled)
- 8. (Cenceled)
- 9. (Canceled)
- 10. (Canceled)
- 11. (Currently Amended) A cartridge for being received into a storage drive <u>having a stopper</u> and retained therein, the cartridge comprising:
- a shell;
- a storage media disposed within the shell for being engaged by a motor of the drive and for receiving a motive force from the engaging motor, and
- a stop feature on a surface of the shell, the stop feature <u>adapted</u> for being contacted by a <u>the</u> stupper of the drive upon ejection of the retained cartridge from the drive, the stop feature ee-acting <u>being adapted to interface</u> with the stopper to stop the ejecting cartridge at a predetermined ejection travel distance.
- 12. (Original) The cartridge of claim 11 wherein the stop feature is a recess on the surface of the cartridge.

13. (Original) The cartridge of claim 12 wherein the stop feature is a generally concave recess on the surface of the cartridge.

- 14. (Original) The cartridge of claim 11 comprising a disk cartridge for being received into a disk drive and retained therein, the disk cartridge comprising a storage disk disposed within the shell for being engaged by a disk motor of the drive and for being rotated by the engaging disk motor.
- 15. (Currently Amended) The cartridge of claim 11 wherein the stopper is mounted to an inner side of a wall of the drive and adjacent a side of the retained cartridge opposite the motor and extends toward and into a path that the cartridge travels during ejection, and wherein the stop feature is positioned on the side of the retained cartridge opposite the motor so as to be contacted by the stopper as the cartridge travels the ejection path.

16. (Canceled)
